Installation MP-8 on 7.8L Duramax

Read all instructions and fully understand them before installing your TS Performance MP-8 module. Disconnect the battery terminals and remove keys from the ignition before installation.

Place Di-Electric Grease onto every electrical connection.

1. Locate a place to mount the MP-8 module inside the engine compartment on the driver's side where it will be free from extreme heat and moisture. Use the supplied zip ties to securely mount the module.
2. Locate the MAP Sensor towards the Driver side of the engine on the Manifold coming from the intercooler. Unplug the factory harness from this sensor and plug the harness from the MP-8 into it.
3. Locate the Fuel Pressure sensor on the Fuel rail shown in picture below. Unplug the factory harness from the ICP Sensor and plug the MP-8 harness into it.
4. From the inside of the cab, route the wire from the adjustable switch through the firewall to the module in the engine compartment.
5. Mount the switch in the dash in a location the driver can easily access.
